

SHE Academy 2024

Invitation

S·H·E

Schools for Health in Europe

SHE Academy 2024

Theme: Research *at* and *with* schools

If you are interested in school health promotion and research within this area, please join this year's SHE Academy 2024!

The focus for this year will be on research *at* and *with* schools.

In the face of numerous threats, pandemic experiences, and visions of an uncertain future, schools worldwide are facing many challenges in relation to the health and wellbeing of all members of the school community. These challenges require a new look at school health promotion, which, to be effective, should address the real needs of its members. These needs and health-promoting measures must be examined not only in schools but, above all, with the active participation of the school community. For this reason, the SHE Academy is an excellent opportunity to share health-related research findings and discuss research methods, practical perspectives, successes and difficulties with researchers and professionals in the field of school health promotion and education. The two-day event also provides an opportunity to gather feedback and build international collaboration and networks in school health promotion.

The 2024 SHE Academy is coordinated by the University of Silesia and the Schools for Health in Europe Network and will be held via an online platform.

Who can participate?

- PhD students with an interest in school health research
- Researchers/academics and policymakers
- Teachers, pedagogues and other practitioners

Max number of participants: 30

Language

English

Fee

Participation is free but requires you to register by May 20th, 2024.

Venue

The 2024 SHE Academy will take place via an online platform (Zoom).

Dates

Session 1: June 3rd at 10-16 CET
Session 2: June 4th at 10-13 CET
Session 3: June 4th at 15-18 CET

To sign up

To participate in the event, you must register using the link below. If you wish to present and get feedback from the SHE RG senior members about your research result/project, you should also provide a one-page description containing the following information: affiliation, title, background, objectives, research questions, methods, results, and conclusions (if available).
