## First Circular

### Conference – Family and school in local environment (14-15. November 2016)

#### *Ladies and Gentlemen,*

We are honoured to invite you to the international scientific meeting related to the mainstream of considerations undertaken in previous years at cyclic conferences, especially we refer to the issues of last-year conference titled School-culture – local environment.

We suggest the discourse concerned on the local life environment, which plays fundamental role in socialization and education: it orients in the world of matter and in the world of ideas; it connects with culture; is a source of identity for individuals, social groups, it facilitates answers to the fundamental questions: who are we, where do we come from and where are we heading?

We are interested in presenting examples of fruitful cooperation of researchers and practitioners from various countries concerned with various realities and in constructive focusing attention on the problem of upbringing in a family, at school and in local environment.

Our intention is to consider the following questions: What are successes and problems of a family? What are chances and risks of upbringing at school? What are the relationships between family environment, school environment and local environment? Does family and school environment contribute to creating local community and if so, what is its influence? On the basis of the analysis of real facts and phenomena we would like to describe social and educational school actions in local environment and to express new forms school activity corresponding to current forms of local communities which emerge as a result of intensive socio-cultural changes.

Specifically, we suggest the discussion around the following issues

- theories, concepts, studies and views concerning family and school as upbringing environments
- values and transmission of cultural heritage in family and at school
- participation of family and school in creating local community
- pedagogical culture of parents and teachers
- experience of institutions and organizations supporting family and school in fulfilling their functions.

Inviting you to interdisciplinary discussion we hope to search and discover together new cognitive and research areas as well as new practical solutions.

We send our regards and invite to attend
