## Beyond Boundaries

Studies in Gender, Masculinity, Culture and Literature

Editor: Adam Dziadek

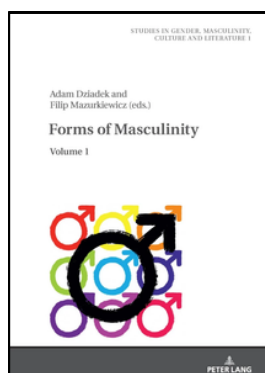

The *Beyond Boundaries* series features monographs and collective works by international scholars who study gender and masculinity in broad cultural and literary frameworks.

The series includes literary, cultural, and cultural anthropology studies, as well as works whose methodological foundations draw on interdisciplinary perspectives ranging from psychoanalysis and sociology through philosophy to history and related areas.

The series invites diverse approaches that critically explore and elucidate the status of contemporary culture and the human condition within the complex, multilayered context of gender entanglements.
