

Dear Sir or Madam,

The European Master programme « **BioPham (BIO&PHArmedical Materials science)** » is a two-year (120 ECTS) programme entirely **taught in English** and jointly operated by the **University of Lille (France)**, the **University of Pisa (Italy)**, the **University of Silesia in Katowice (Poland)** and the **Polytechnic University of Catalunya in Barcelona (Spain)**.

The Master's diploma is awarded after completion of 3 semesters, which consist of courses and one semester which consists of practical training / Master's thesis.

BioPham answers to an international demand for qualified graduates with theoretical and applied high-level training in materials science and physics & chemistry of materials and their applications to pharmaceuticals and biopharmaceuticals.

The first call for application to be a BioPham student in September 2023 is open until **February 20th, 2023 – 23 :59 Brussels' time**.

By applying to the BioPham Master programme during this first call, **the students automatically apply for an Erasmus Mundus Joint Master Degree (EMJMD) Scholarship**.

As scholarship holders, the students are provided with :

- **2 000€/year** if the place of residence is less than 4 000 km from BioPham coordinator (University of Lille)
- **3 000€/year** if the place of residence is more than 4 000 km from BioPham coordinator (University of Lille)
- **1 000€** as a contribution to installation costs
- **1 000€/month** as a living allowance for the entire duration of the programme
